GLASS SHOWERS

dg DORMA
GLAS®

Moving solutions. Living spaces with glass.

With our passion for the material glass we create something really big from something small. Thus a pure dynamic arises from a perfectly coordinated and technically precise Glass fitting..

Because it is the small elements with a big effect that make the movement of glass between rooms possible in the first place.

That is our self-conception. And we are committed to this with all our knowledge of the possibilities of glass in moving solutions.

MORANO S1
Double-action door
showers

If required, the doors can be opened inwards for ventilation.

Glass showers

For the modern bathroom, glass showers create a greater sense of space and lend a certain exclusivity. Glass showers are timeless and create visual highlights in the bathroom. They impress with their durability, are easy to clean and convey a sense of lightness.

Depending on the room layout and installation situation, different functional and design fittings can be used to create user-friendly glass showers. Swing door showers, for example, allow individual access to the shower, while single-action door showers with outward-opening doors represent classic shower access. Space-saving folding doors with the largest possible shower entrance create more space, while sliding doors are easy to operate and ideal for confined spaces. Walk-in showers are doorless, freely accessible and smart in appearance.

Sliding door showers

User-friendly and particularly suitable for confined spaces.

Folding door showers

Create more space and freedom of movement in small bathrooms.

MORANO S1

For easy access to the shower, the glass doors open both inwards and outwards and always swing back into the closed position independently thanks to the adjustable zero position.

MORANO S1

Double-action door shower fittings with adjustable zero position

This shower fitting series offers convenience in many respects. Technically, the adjustable zero position enables optimum installation and alignment of the glass doors. Thanks to the 90° opening angle on both sides, access to the shower is extremely convenient. In terms of appearance, the series impresses with its modern, classic and discreet design.

Your advantages:

- 90° opening on both sides and gentle door self-closing to the zero position from 20°
- Efficient installation thanks to adjustable zero position and slotted hole adjustment in all wall mounting plates
- Cover caps for invisible screw connections and minimal gap dimensions
- Suitable for sauna cabins up to 90 °C

Find more information and documents here.

◀
MORANO S1 XL
 Even if there is no visible difference on the outside, the higher spring force makes it possible to create showers in XL format.

MORANO S1 XL

Double-action door shower fittings for XL showers with adjustable zero position

Same features and same size as MORANO S1, but stronger for heavy-duty use. MORANO S1 XL shower fittings are ideal for large-format showers. Unchanged in handling and design, with minimal gap dimensions and invisible screw fittings, MORANO S1 XL glass showers are nevertheless discreet and flawless.

Your advantages:

- 90° opening on both sides and gentle door self-closing to the zero position from 20°
- Heavy-duty door fittings for a maximum door leaf weight of 60 kg
- Efficient installation thanks to adjustable zero position and slotted hole adjustment in all wall screw plates
- Cover caps for invisible screw connections and minimal gap dimensions

Find more information and documents here.

◀
TANORA S1
Classic single-action
doors, opening on
one side for standard
shower access.

TANORA S1

Single-action shower door fittings 90° opening on one side

Easy and convenient entry: TANORA S1 single-action door showers can be opened on one side. Installed as standard, there needs to be enough space in front of the shower for the shower door to open outwards without any problems. Continuous plastic profiles on all glass edges guarantee optimum tightness.

Your advantages:

- 90° opening on one side
- Efficient installation thanks to slotted hole adjustment in all wall screw-on plates
- Continuous sealing profiles on all glass edges
- Cover caps for invisible screw connections and minimal gap dimensions

Find more information
and documents here.

4

TANORA S2

When operated, the shower doors lift up by 5 mm, thus protecting the lower sealing profiles.

TANORA S2

Single-action door shower fittings with raise/lower function

TANORA S2 glass showers enable threshold-free access to floor-level glass showers. Thanks to the lift-and-lower function in the door fittings, the glass doors are raised by 5 mm when operated, which also protects the lower sealing profiles, and are self-closing when lowered.

Your advantages:

- 90° opening on one side
- Glass doors lift by 5 mm when operated and are self-closing when lowered – ideal for floor-level showers
- Efficient installation thanks to slotted hole adjustment in all wall screw-on plates
- Continuous sealing profiles on all glass edges
- Cover caps for invisible screw connections and minimal gap dimensions

Find more information and documents here.

**Wall or ceiling
mounting**

One system, two
installation options,
versatile convenience
functions.
Wall mounting also
available as a partially
framed version.

ATENO S1

Sliding-door shower system with soft-closing and retractable function

The sliding door shower system is flexible to install, ideal for all age groups and suitable for both small and large bathrooms in private and commercial buildings.

When opening and closing, the door leaves are slowed down quietly and without impact thanks to the damping function, and then pulled safely into the end position without springing back using the retraction function. To clean the overlapping glass elements, the magnetic floor guide can be easily and effortlessly divided by foot operation (no annoying bending). The glass elements then pull back together again over the last few centimeters – it couldn't be easier!

Your advantages:

- Horizontal opening
- Easy to operate
- Cushioning and retraction function on both sides
- Separable divisible magnetic floor guide for easy glass cleaning
- For wall and ceiling installation
- Space-saving, ideal for small bathrooms

Find more information
and documents here.

◀ **Classic walk-in shower**
Fixed partition wall mounted on the wall and braced with transverse stabilization bar.

▶ **Corner walk-in shower**
Fixed partitions mounted in the room on the rear wall, braced with transverse stabilization bar.

MORANO & TANORA

Fixed part fittings

for walk-in showers and more

Open walk-in showers without a door with a flat shower tray or floor-level tiling can be realized with fixed fittings. This type of glass shower is becoming increasingly popular. Whether as a single partition wall or as corner solutions, barrier-free access to the shower is particularly appreciated here. Furthermore, the various fixed fittings are used for the installation of fixed elements in closed shower enclosures.

Your advantages:

- Wide range of fitting variants
- For fixed elements in closed shower enclosures
- For fixed elements in walk-in showers
- Any glass dimensions
