GLAS®

The new lock design – now even more diverse

After the exclusivity and quality of the lock and handle combination of the „First“ and „Black Edition“ were very well received, **STUDIO1121** is now going into series production. The extraordinary design of the previous versions is now being continued in our tried and tested finishes and in a wide range of lock variations. The design and haptics of the **STUDIO1121** series can be perfectly combined with our OFFICE Classic hinges.

Special design due to special manufacturing process

The milling of the lock caps out of solid aluminium allows finely worked out radii and defined edges. The remaining material thickness visibly shows the special value of the fitting. Equally high-quality, the powder coating of the lever handle, lock and hinge surfaces not only flatters the eye, but also the sense of touch – a good feeling with every contact.

Exclusive, modern and elegant

Now choose a set in our proven eloxated or powder-coated finishes. Is an individual design desired? With our in-house powder coating, there are no limits to the colour possibilities. Create a harmonious overall appearance by matching **STUDIO1121** to the colour tones of existing DORMA-Glas elements with our

standard surfaces. Also in the lock variants, you have the options of non-locking latch, non-locking latch, lever forward, prepared for profile cylinder, toilet lock and the matching strike-box. Discover the combination that integrates optimally into your installation environment.

Made in Germany

In our view, premium quality begins with the development of ideas in-house. It continues with the selection and procurement of convincing materials and applies to the entire production process right through to surface finishing. The powder coatings are also applied in our in-house facility with special attention to environmental compatibility.

Technical data

Glass:	TSG
Glass thickness:	8 mm (in frames with 24 mm rebate depth) 10 mm (in frames with 26 mm rebate depth; with special latch on request also in frames with 24 mm rebate depth)
max. door weight:	45 to 60 kg (depending on the combination of STUDIO hinges and frame parts used) / upto 80 kg (depending on the combination of OFFICE hinges and frame parts used)
Lock application:	non-locking latch, profile cylinder, toilet lock
Applications:	1-/2 panels, sidelight
Material:	Aluminium
Surfaces (xxx):	› AL anod Silver (150), › AL anod sim. Stainl-Steel satin (157), › AL p-coat Jetblack (304), › AL anod Special (199), › AL p-coat Special color (399)
